

Holman 2024

Technology Update

**CIPMM Fleet Management Workshop
October 29–30, 2024**

Themes Throughout The Day

Ease of Doing Business

- Reduce Friction
- Improved Visibility
- Enhanced Customer & Partner Experience

Consumerization of Technology

- Post Covid World
- New Expectations
- Seamless Experiences

Intelligence

- Preparing For the Future
- Platform Enablement

Technology Roadmap

BUSINESS EASE

- Support Center
- User Roles
- Lease Agreement PDF Delivery
- Mobile App SSO
- PriceNet Enhancements

CONSUMERIZATION OF TECHNOLOGY

- TRX Roadside Integration
- EV Driver Reimbursement
- DVIR Integration
- WEX Fuel for Canada

INTELLIGENCE

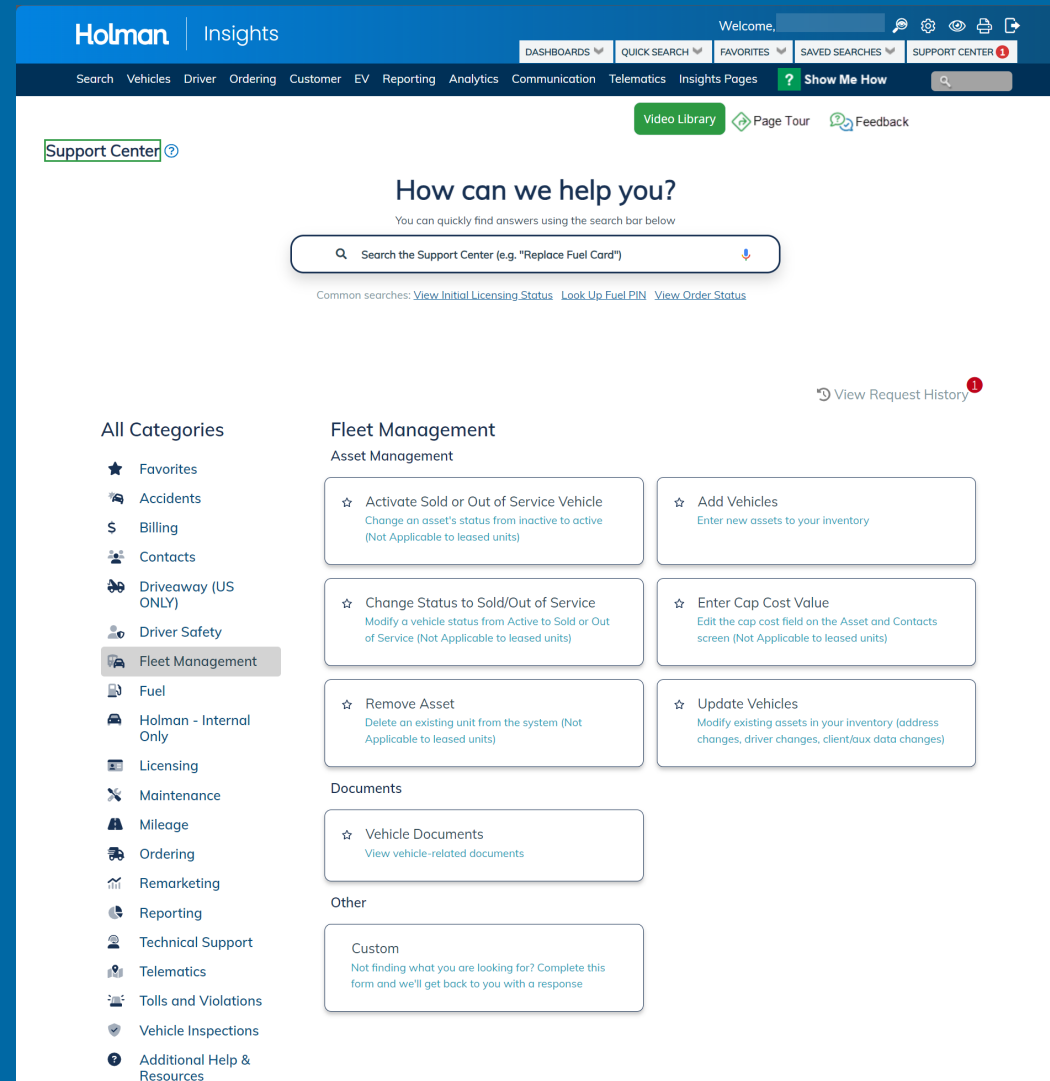

- Asset Demand
- Driver Safety Scorecard Access
- Reporting Hub 3.0

Support Center

What's New

- Simpler and Easier to use
 - Engage directly with SME's
 - Improved transparency to status & updates
 - 150 Transactions Available
 - Smart Search Functionality
 - Find what you need quicker
 - Self Service Actions
 - Insights will readily guide users through the respective inquiry or request

What's New in Support Center

CC User Functionality

The screenshot displays the 'All Requests' page in the Support Center. A request with ID 27033 is in the 'In Progress' state. The 'Details' section shows the client code '9010 - SET UP AS A CIS DEMO - US' and a note 'What would you like us to know? test'. The 'Notification Settings' section shows 'SMS Text Messages' are turned off. A modal titled 'CC Email - Identify Recipients' is open, allowing the user to add email addresses to the request. The modal includes a search bar, a list of added contacts, and a note about access for Insights Users.

Sample@email.com

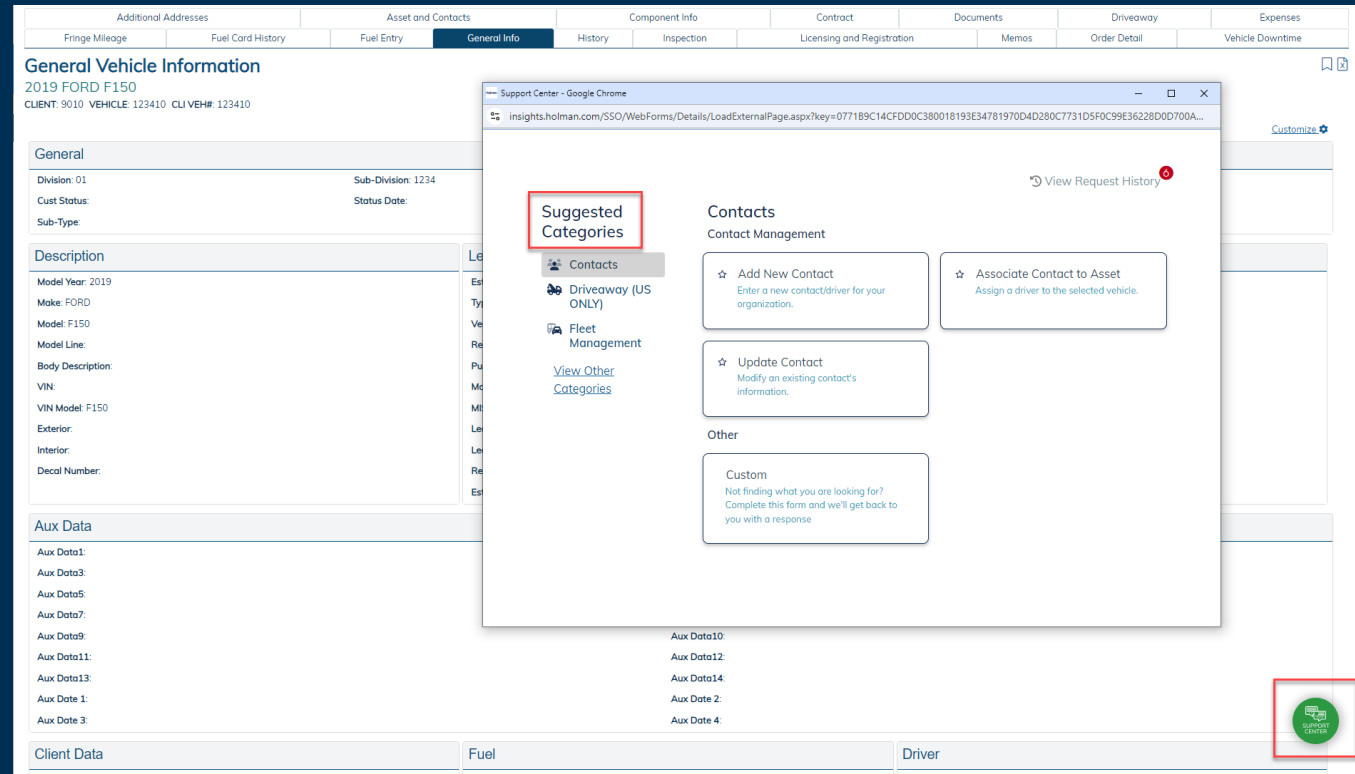

ⓘ Please note that CC recipients with an active Insights User ID will be able to access this request through Support Center

Close Save

- Capability to CC additional users on a single request
- Additional users can receive notifications as request is processed
- Copy to any email but only Insights Users can access in Support Center

What's New in Support Center

Integration into Existing Insights Pages

- Allows users to submit requests without navigating off current page
- Suggested Categories for Request Types that are related to current page
- Current vehicle will auto populate in Request Submission page

What's Coming to Support Center

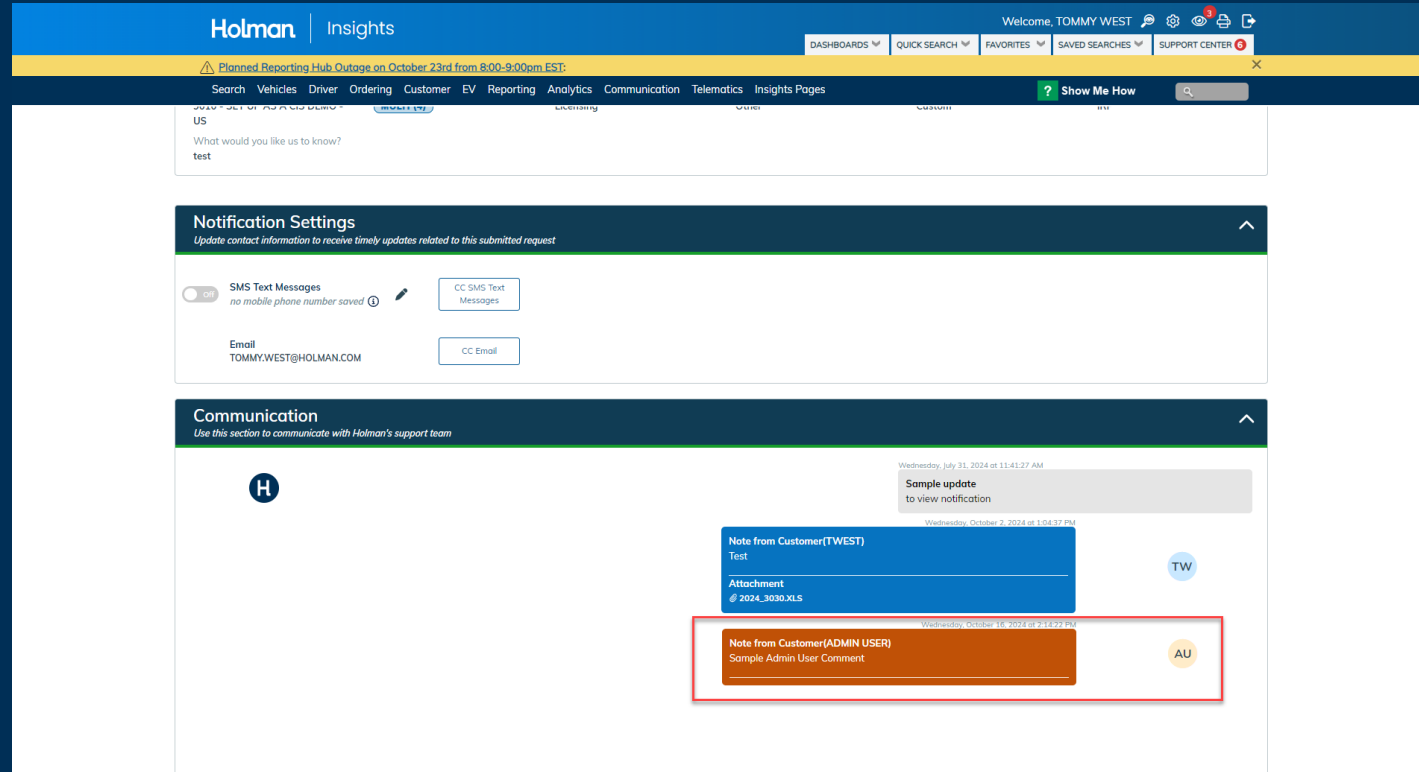

Ability to transfer requests to other users

- Allows users to transfer requests to other Insights users
- Bulk capability if owner becomes disabled

What's Coming to Support Center

Admin users can engage in all requests

- Today can only view other requests if they have not been CC'd
- Will allow Admin users to override or approve items within requests

Support Center

What's Next

- Canadian Focused Use Cases
 - Storage Requests
 - Transport Requests and Status
 - Provincial Transfers
 - Language Translations
- Administration Capabilities
(Who can see & do what features)
- Dashboards and reporting

The screenshot displays the Holman Insights UAW Strike Support Center. The header includes the Holman logo, 'Insights UAW Strike', and user information 'Welcome, GREG RAVEN'. Navigation links for DASHBOARDS, QUICK SEARCH, LANGUAGE, FAVORITES, SAVED SEARCHES, and SUPPORT CENTER are present. A secondary navigation bar lists various topics: Search, Vehicles, Driver, Ordering, Reporting, Analytics, Communication, Telematics, and Insights Pages. A 'Show Me How' button is also visible.

The main content area is titled 'How can we help you?' with a search bar and a note: 'You can quickly find answers using the search bar below'. Below the search bar, common searches are listed: Report Accident Claim, View Initial Licensing Status, and Look Up Fuel PIN.

The 'Request History' section is titled 'Request History' and includes a 'View Request History' link. It states: 'You can view your requests, monitor the status and communicate with your account support team.' A 'Back' link is provided.

The 'Quick View' section allows users to filter requests by status. It shows the following counts: Recent Update 15, Submitted 0, In Progress 25, On Hold 0, and Completed 39.

The 'Your Requests' section includes a search bar and a table of requests. The table has columns for Request Number, Status, Program, Client Code, Vehicle, Driver, and Last Updated. The requests are sorted by status, with 'Completed' requests at the top and 'In Progress' requests at the bottom.

Request Number	Status	Program	Client Code	Vehicle	Driver	Last Updated
10939	Completed	Ordering Custom	08G4	-		10/24/2023 4:06:38 PM
● 10940	Completed	Tolls and Violations Toll Violation Inquiry	08G4	800318	MATTHEW MCKINNEY	10/30/2023 9:15:22 AM
● 10944	Completed	Ordering View Order Status	08G4	807282	JACOB PAFFHAUSEN	11/01/2023 10:05:57 AM
11625	Completed	Ordering View Order Status	08G4	807994	ALEX LEYH	10/30/2023 4:16:44 PM

Insights – Operational Efficiencies

What's New

Stock Requests

- Quicker Stock Requests Turnaround Times
- New document uploads for upfit quotes
- Smarter Licensing Setup
- Used vehicle management
- Preapproval limits to expedite orders
- More robust data management

Asset Demand

What's Next

- Running list of vehicles approved to be ordered when their order banks open
- Ability to see which areas of the fleet need vehicles and equipment
- Allow a Fleet Manager to repurpose minimally used vehicles vs ordering new vehicles as replacements
- Track vehicle requests against fiscal budget

Reporting Hub 3.0

What's New

- Ability to customize an existing report
- Ability to create visuals (KPI, widgets) against the report data
- AI inclusion to assist with report creation

The screenshot displays the Reporting Hub 3.0 interface, which is divided into two main sections: a sidebar and a main content area.

Sidebar:

- Reporting Hub Home** (selected)
- Favorites**
- Recently Saved**
- Recently Viewed**
- Create Report**
- View Templates**
- Schedule**

Main Content Area:

The main content area is titled "Reporting Hub" and contains a "Home Page Title" section with a "Create New Report" button. Below this, there are two charts: "Inventory by Asset Type" and "Inventory by Model Year".

The "Recently Saved" and "Recently Viewed" sections are visible, each with a "see all" link. The "Recently Saved" section shows a list of reports with titles and descriptions. The "Recently Viewed" section shows a list of reports with titles and descriptions.

The "Create Report" section is the primary focus, showing a form for creating a new report. It includes fields for "Name of Report", "Select Client", "Select Division", and "Select Sub-Division". Below these fields, there are buttons for "Billing", "Fuel Information", "Maintenance and PO Detail", and "Vehicle Information".

The "Billing Report Options" section is expanded, showing a list of fields to be included in the report. The fields are: CLIENT CODE, VEHICLE NUMBER, CLIENT VEHICLE NUMBER, ATA DESCRIPTION, PO LINE ITEM ATA DETAIL, PO LINE ITEM ATA GROUP, PO LINE ITEM ATA PRODUCT, AVG EXPENSE AMOUNT, CLIENT NAME, DELIVERY MONTH, DELIVERY YEAR, and DELIVERY DATE. The "Columns" section shows a list of columns to be included in the report, with "CLIENT CODE" selected. The "Filters" section shows a list of filters to be included in the report, with "Selected Client(s)", "Selected Division(s)", and "Selected Sub-Division(s)" selected.

The "Add Additional Restrictions" section is visible at the bottom, with an "Add Field" button. The "Cancel" and "Save" buttons are at the bottom right.

WEX Fuel for Canada

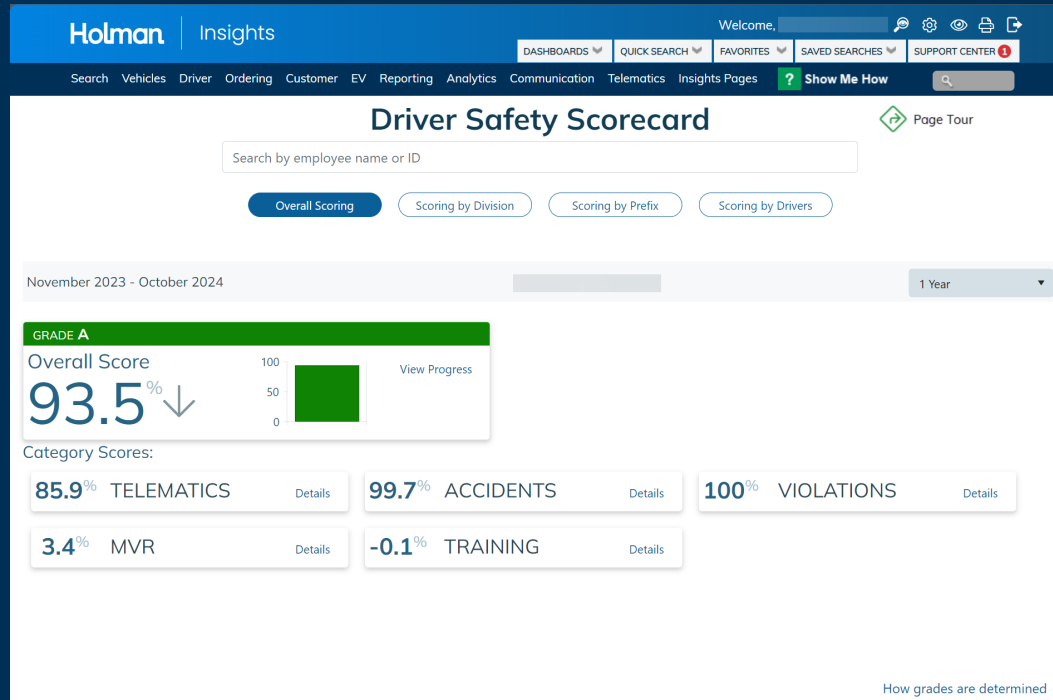

What's Next

- Manage fuel cards and PINs with Holman Insights
- Create fuel profiles and track fuel spend
- Driver-based fuel alerts
- Realtime authorization tracking
- Fraud reduction due to utilizing WEX Fraud monitoring process

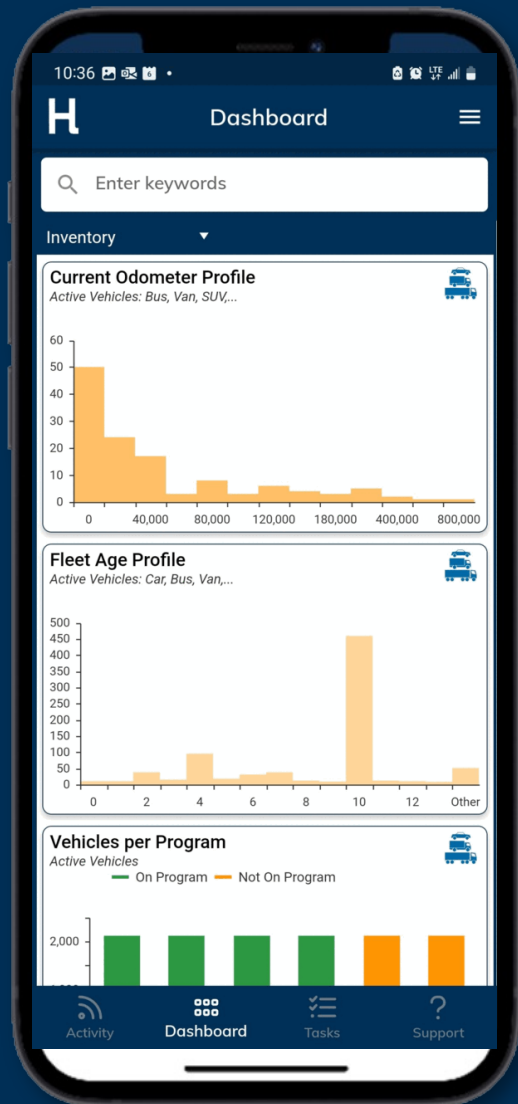

Driver Safety Scorecard Access

What's Next

- Ability to choose which driver Contacts are included or excluded in the Scorecard
- Contact data fields can be used to restrict access to the Scorecard for driver Contacts

Driver ID & Telematics Fringe

Matching Driver to Vehicle Location

Using vehicle location provided from Telematics devices, we can associate a vehicle's reported trips to the driver using their mobile device's location

Telematics Trips for Fringe

Trips can be generated using Location data and vehicle start/stop times.

Trip Categorization

Trips can be categorized by Business/Personal for fringe tracking, but they can also have custom client-defined categorizations for more detailed trip logging.

Future Telematics Enhancements

Equipment Ordering Revamp

- Intelligent Quick Order Flow that suggests compatible harnesses based on vehicle/device selections.
- Redesigned bulk order flow directly in Insights.

Vehicle Diagnostics Integration

- New KPIs and Alerts that utilize telematics vehicle diagnostics data.
- New page in Driver app to highlight telematics vehicle diagnostics data.

Camera Events Integration

- Telematics Dashcam Events will be integrated into Insights.
- New KPIs and Alerts that showcase camera exceptions (EX: in-cab smoking, distracted driving)

Thank You

Holman
