- epost Connect Collaboration is a cloud based secure document delivery and collaboration tool
- Collaborators create Conversations and invite users to the conversation – like a group chat on a messaging app
- Data stored on servers located only in Canada so it's not subject to intrusive access to information laws from foreign countries
- Protects your data with 256 bit AES encryption at rest and in transit

Public Services and Procurement Canada

"Business Management Directorate at PSPC now uses epost Connect with great success for its national bid receiving electronic modernization initiative. The product is easy to use and integrate into multiple business contexts, has large data transfer capacity and is secure to Protected B.

Our internal clients and suppliers have been very pleased with the new service. **We have saved thousands of sheets of paper per year, reduced processing time, as well as storage and delivery costs.**

This initiative was highlighted as part of PSPC success in contributing to the Procurement modernization initiative and has been greatly applauded by TBS and Senior Management of PSPC."

Alfred Chalhoub, CPA
Director
